

On February 20th 2020, A study day was held in the location of the 30 laboratories organized by the LLC laboratory in collaboration with the PRFU research team working on “Incorporating e-learning platforms in higher education to support ESP teaching” around the theme of the project. Eleven participants, mainly doctoral researchers, presented their works tackling the integration of e-learning in different ESP contexts, the use of ICTs in teacher education, the use of technology in ESP assessment, and pedagogical e-learning challenges. The debate which was engaged was constructive and highlighted some essential conditions that need to be gathered to succeed in the incorporation of technology, namely e-learning, in Higher education in ESP teaching situations. Among these conditions focus was on raising teacher and student technology awareness, teacher roles and adequate equipment.
