Manuscript**

on **December 16th, 2024**

Conference Presidents:

Dr. Salima DALI

Dr. Fatima Zohra ADDER

Call for Papers:

The linguistic manuscript is one of the important aspects that constitute a language, and it has garnered attention from modern linguistic studies, especially those related to the incorporation of computational technology in its recognition and production. This type of study poses a challenge for the Arabic language, given the unique features of Arabic manuscripts. Recently, there has been an interest among Arabs in this type of studies to uncover the linguistic and cultural heritage and resources of the Arab world.

In this respect, the topic of this national conference entitled "Prospects for the Automatic Treatment of the Arabic Linguistic Manuscript" has emerged, which aims to monitor the most important technologies and modern research that have dealt with the Arabic manuscript in both its printed and handwritten forms.

Objectives of the Conference:

- Understanding the reality of Arabic language treatment and its future prospects.
- Presentation of the latest scientific researches in the field of Arabic language treatment.
- Encouraging cooperation and scientific communication among specialists in the field of automatic manuscript treatment.
