at the 30 Laboratories Building

Study Day Objectives

Given the diversity of educational research and the complexity of studying human language, choosing research methods in language sciences and education can present several difficulties for researchers in general, teachers, and doctorate students in particular. Research methodology can be a challenging aspect of doctoral studies, be it in language sciences, education, or any other specialty. It entails knowing different ways to do research as well as different instruments and techniques. PhD students may find these methods intimidating due to their complexity, particularly in areas such as mixed-methods research or quantitative analysis, lack of experience as novice researchers mainly while integrating methodologies from multiple disciplines, resource restraints, and logistical challenges in data collection and analysis in addition to ethical considerations. Keeping abreast of new technological developments and acquiring the necessary technical skills to apply them effectively in research can be challenging for doctoral students as well.

Our concern in this study day is to spotlight the main difficulties and challenges that researchers in general, and PhD students in particular, may encounter in conducting their research.

Tracks

Contributions are to be sent following, but not limited to, these tracks:

- ✓ Theoretical frameworks
- ✓ Methodological approaches
- ✓ Data Collection Techniques
- ✓ Data Analysis Challenges
- ✓ Technology and Innovation in Research
- ✓ Artificial Intelligence in Research
- ✓ Discussion and Interpretation
- ✓ Ethical Considerations

Abstracts that are no longer than 250 words should be sent to doc.stday2024@gmail.com before **June 9th, 2024**. Proposed abstracts must include:

- Name of the participant
- Affiliation
- Current email address
- Title of paper
- Selected track
